October 30, 2017

Ms. Robin Tedesco  
Business Administrator  
Parsippany Troy Hills School District  
PO Box 52  
Parsippany, NJ 07054

AERO Environmental Services Inc. (AERO) was contracted by the Parsippany-Troy Hills School District to collect bulk samples of a suspect mercury containing polymer floor in the **Littleton School Gym**.

**BACKGROUND**

The gymnasium floor is a solid rubber-like polymer floor covering over concrete. Rubber-like polymers floors may have used mercury as a catalyst when mixing the polymer to form the floor covering.

**DISCUSSION**

Two (2) bulk samples were collected from the gym floor. Each sample collected was approximately 1 inch by 1 inch. The samples were submitted to EMSL Analytical, Inc. for analysis for mercury content.

**CONCLUSIONS**

Based on the results, **both samples confirm the rubber-like polymer floor contains mercury.**

Sample FL-LS-1, next to cafeteria table in corner (northside) contained **200 mg/kg** (milligram per kilogram). This is equivalent to 200 ppm (parts per million).

Sample FL-LS-2, next to cafeteria table by storage room (southside) contained **270 mg/kg** (milligram per kilogram). This is equivalent to 270 ppm (parts per million).

**RECOMMENDATIONS**

It is unknown what the current exposure levels are to students and staff. A sampling strategy with air monitoring should be conducted. Sampling should be conducted under several different building conditions. Indoor mercury emission levels may change based on room temperature or HVAC ventilation rates. This can cause exposure levels to be different during different times of the year.

If there are any questions regarding this report, please contact me right away.

Sincerely,

Michael S Berta  
Manager EHS

The following analytical report covers the analysis performed on samples submitted to EMSL Analytical, Inc. on 10/16/2017. The results are tabulated on the attached data pages for the following client designated project:

**Littleton - Gym**

The reference number for these samples is EMSL Order #011708322. Please use this reference when calling about these samples. If you have any questions, please do not hesitate to contact me at (856) 303-2500.

Approved By:

Phillip Worby, Environmental Chemistry  
Laboratory Director

The test results contained within this report meet the requirements of NELAP and/or the specific certification program that is applicable, unless otherwise noted.  
NELAP Certifications: NJ 03036, NY 10872, PA 68-00367, CA ELAP 1877

The LCS recovery for Mercury was outside of the method control limits (low), therefore the results may be biased low.

The samples associated with this report were received in good condition unless otherwise noted. This report relates only to those items tested as received by the laboratory. The QC data associated with the sample results meet the recovery and precision requirements established by the NELAP, unless specifically indicated. All results for soil samples are reported on a dry weight basis, unless otherwise noted. This report may not be reproduced except in full and without written approval by EMSL Analytical, Inc.
