

Parsippany-Troy Hills Township Schools

Written Hazard Communication Program 2017 - 2018

Policy and Administration

This notice is to inform you that our agency complies with the Public Employees Occupational Safety and Health Program Hazard Communication Standard (PEOSH HCS), N.J.A.C. 12:100-7, which New Jersey adopted with amendments, on May 3, 2004. We provide information about the hazardous chemicals in our workplace, their associated hazards, and the methods for controlling these hazards. We have put in place the following required elements of the Standard:

- (1) A list of hazardous chemicals;
- (2) Material Safety Data Sheets (MSDSs) and Hazardous Substance Fact Sheets (HSFSs) for hazardous chemicals;
- (3) Labeled containers; and
- (4) A training program for employees who work with or have a potential for exposure to hazardous chemicals.
 - Full training for all new affected employees with a certified consultant reviewed and approved by the NJDHSS Right to Know Program.
 - Refresher training for all affected employees every 2 years with a certified consultant reviewed and approved by the NJDHSS Right to Know Program.

This written program applies to all work operations in our facility where employees are exposed or may be exposed to hazardous chemicals or conditions under normal working operations or during foreseeable emergency situations.

Robin C. Tedesco, Business Administrator, located in the Board Office Building at 292 Parsippany Road, Parsippany, NJ, is the program coordinator who has overall responsibility for the written program and responsibility for the annual review and update of the written program. Mrs. Tedesco also makes available the written program to employees upon their request within three days of the request.

As required under the PEOSH HCS, employees will be informed of the contents of this program, the location and availability of health and safety information about hazardous chemicals, the hazardous properties of chemicals with which they work, safe handling procedures for the hazardous chemicals, and measures they should take to protect themselves from the hazardous chemicals. This information will be provided during employee training sessions and/or safety meetings. Employees will also be informed of the hazards of non-routine tasks such as specific waste removal or intumescent painting.

List of Hazardous Chemicals

The list of hazardous chemicals in this facility is prepared by an accredited environmental firm. The list is continually updated and is included at the back of this program. Although not required by the PEOSH HCS, a separate list is available for each work area.

Material Safety Data Sheets (MSDSs) and Hazardous Fact Sheets (HSFSs)

MSDSs and HSFSs provide health and safety information on the specific hazardous products or chemicals employees use. In compliance with the PEOSH HCS, the MSDSs are made readily accessible during each work shift to employees when they are in their work area. Tom Gaveglio, Supervisor of Building and Grounds, obtains MSDSs on all products containing hazardous chemicals and HSFSs on all hazardous chemicals, facilitates having copies of the MSDSs put in a binder in each work area of this facility, and maintains a master file of all the MSDSs and HSFSs in his office. If additional information is needed about a hazardous chemical or product, if an MSDS is missing, or if an MSDS has not been supplied with the initial shipment, Tom Gaveglio or his designee, will contact the manufacturer or supplier. The people listed below will ensure that the MSDSs kept in each work area are updated as needed and the MSDS binder is kept intact, and that HSFSs are updated as needed. **Procedures to follow at each school to expedite this process are provided on page 5 of this document.** As a policy of this facility, an MSDS and HSFS hard copy will be provided to the requesting employee immediately upon request, or within 3 working days of the request if the MSDS or HSFS is not immediately available.

<u>Name</u>	<u>Work Area</u>
Tom Gaveglio	Maintenance Building
David DuBois	Maintenance Building
Principal/or Designee	School Building

Any new procedures or products that are planned to be used in this workplace must be approved by Tom Gaveglio before use to make sure that MSDSs and HSFSs are obtained before use.

Labels and Warning Systems

Tom Gaveglio ensures that each container of hazardous chemicals in this workplace is properly labeled as required by the PEOSH HCS, and updates the labels as necessary if they should become illegible, fall off the container, or are obscured in any manner. Containers not bearing the PEOSH HCS label are not accepted by our facility.

- Stationary containers in an area with similar contents and hazards have signs posted on or above them to convey the hazard information.
- Employees transferring hazardous materials from a labeled container to a portable container intended only for their immediate use during the work shift, do not have to label the portable container. If the portable container is stored beyond the employee's shift, or will be used by other workers, the employee must label the portable container with the PEOSH HCS information from the properly labeled larger container.

Hazardous Non-Routine Tasks

Periodically our employees are required to perform hazardous non-routine tasks such as: Specific waste removal or intumescent painting.

When employees are required to perform the above hazardous non-routine tasks, a special training session is conducted to inform them about the hazardous chemicals to which they might be exposed and the proper precautions to take to reduce or avoid exposure. This special session is conducted by Tom Gaveglio or his designee prior to employees beginning the task. Employees who perform these non-routine tasks are notified about the training by their supervisor, and are required to attend the training.

Employee Training

Every employee who works with or has the potential for exposure to hazardous chemicals under normal conditions of use or in foreseeable emergencies will receive initial and refresher training under the PEOSH HCS on the safe use of those hazardous chemicals. Tom Gaveglio is responsible for scheduling training with a technically qualified person. A training program that uses both audiovisual materials and classroom instruction has been prepared for this purpose.

- The trainer meets the definition of a technically qualified person.
- Whenever a new hazard is introduced into the work area, an **additional training session** is provided for workers in a scheduled safety meeting conducted by a technically qualified person prior to beginning work with the new hazardous material. Supervisors notify employees about the safety meetings.
- **Refresher training**, an abbreviated version of initial training, is conducted every two years. Area supervisors notify employees when the training session is scheduled, and a notice is placed on the bulletin board inside the break room.
- **Attendance is mandatory at all training sessions** for those workers identified as exposed or having the potential for exposure to hazardous chemicals under normal conditions of use or in foreseeable emergencies.
- Training is provided at no cost to the employee and is provided during working hours. The training is appropriate in content and vocabulary to the educational level, literacy and language of the employees.
- The documentation of training required by PEOSH HCS is maintained in the office of the Business Administrator.

As a policy of this facility, foremen and supervisors receive supplemental training from selected manufacturers' representatives when specialty equipment is purchased and when non-routine hazards arise due to a new operation. They then can answer employee questions and provide daily monitoring of safe work practices.

The **initial training session** includes the following discussion items:

1. An explanation of the PEOSH HCS and this written program;
2. Chemical and physical properties of the hazardous materials (e.g., flash point, reactivity) and methods used in this workplace to detect the presence or release of hazardous chemicals (including the chemicals in piping systems);
3. Physical hazards of chemicals such as the potential for fire and explosions;
4. Health hazards (both acute and chronic) associated with exposure to hazardous chemicals, signs and symptoms of exposure, and any medical condition that may be aggravated by exposure to the chemical, using MSDSs and HSFSSs;
5. Methods to protect against exposure to the hazard such as engineering and administrative controls, proper work practices, use of personal protective equipment (PPE), and procedures for emergency response to spills and leaks;
6. Standard operating procedures to assure protection when cleaning hazardous chemical spills and leaks;
7. The location of and responsible person for maintaining MSDSs, HSFSSs, Right-To-Know (RTK) Survey, RTK Hazardous Substance List (HSL), and other hazardous material information;
8. An explanation of the applicable provisions of the Worker and Community RTK Act;
9. How to read and interpret that information of PEOSH HCS and RTK labels, HSFSSs and MSDSs, and how employees may obtain additional hazard information using the RTK Survey and RTK HSL;
10. A copy of the RTK brochure is handed out during training.

The initial and refresher training programs for employees are reviewed annually by the trainer, who will notify area supervisors of the training needs of their employees. As part of the assessment of the training program, input from employees regarding the training they have received and suggestions for improving the training are obtained through training evaluation forms. In addition, suggestions may be placed in the employees' suggestion-box.

Employee **refresher training** is an abbreviated version of the initial training, and includes a discussion of the following information:

1. An explanation of any changes in the written program, PEOSH HCS, or RTK Act.
2. Changes in products used or work processes that may cause exposure to hazardous chemicals.
3. A review of health hazards, chemical and physical properties of the hazardous chemicals, and control methods of any routinely used hazardous materials and any new hazardous material to which the employees may be exposed. The MSDSs and HSFSSs will be used to review information on the hazardous chemicals.
4. A review of the facility's health and safety policy and procedure manual.
5. A copy of the RTK brochure is distributed.

Contractor Employees

Tom Gaveglio or the district architectural firm advises outside contractors in person of any chemical hazards that may be encountered in the normal course of their work on the site, the labeling system in use, protective measures to be taken, the location and availability of MSDSs, HSFSSs, and other health hazard information, and the safe handling procedures to be used for these materials.

It is our policy that each outside contractor who brings hazardous chemicals on the site will provide Tom Gaveglio with copies of appropriate MSDSs for the hazardous chemicals, information on any special levels used, and precautionary measures to be taken while working with or around their hazardous chemicals or products.

Districtwide Procedures For Obtaining MSDS Sheets and Properly Labeling All Chemicals

1. When supply orders are delivered to the schools or administrative buildings in the district, they will be opened by the Front Office Secretary and he/she will make a copy of the packing slip or paperwork that lists what the contents delivered are. The Secretary will then put the original paperwork back in the box and process the package as usual.
2. The Front Office Secretary should send the packing slip and related paperwork to Tom Gaveglio in the Maintenance Department. The Maintenance Department will review the paperwork and research items that need MSDS sheets. After that has been done, the Maintenance Department will create a label for the product. The MSDS sheet and label will be sent back to the Front Office Secretary. The Front Office Secretary should file the MSDS sheet in the appropriate MSDS binders. The Front Office Secretary will then place the label in the appropriate teacher's mailbox with instructions to place on the product. Finally, an additional copy of the MSDS sheet should be filed in the Maintenance Department and a copy sent to the Board Office.

All Employees, or their designated representative, can obtain additional information on the written program, the PEOSH HCS, applicable MSDSs and HSFSSs, and other chemical information from Robin C. Tedesco, Business Administrator, 292 Parsippany Road, Parsippany, NJ 07054.

Robin C. Tedesco
Business Administrator/Board Secretary
