

VOLUNTARY CLEANING INFORMATION

September 1, 2020

To all Parsippany/Troy Hills Faculty,

Please be advised that each classroom has been supplied with a spray bottle of “Bioesque” cleaner/disinfectant and a roll of paper towels. This is available for teachers use at their discretion throughout the school day. Whenever a refill of the product or additional paper towels are needed please contact your locational custodial department and they will refill the bottle and deliver additional paper towels when requested.

This product is to be lightly sprayed on the surface and left on for at least 4 minutes wet. There is no need to saturate the surface. It does not have to be wiped off after it is applied. It is best if it can air dry. As is common with any product of this type **do not get near or in one’s eyes.** Although this is not specifically stated on the label, it is common sense handling of any cleaning/disinfecting product.
